Salgs- og leveringsbetingelser

for INOX STÅL HANDELSSKAB A/S ("INOX")

1 Generelt

For alle salgsaftaler gælder udelukkende nedenstående betingelser, for så vidt der ikke er uravregelige lovbestemmelser og medmindre andet er skriftligt aftalt. Købers egne indkøbsbetingelser forpligter ikke INOX, medmindre andet er aftalt og skriftligt bekræftet af INOX.

2 Tilbud og købsordre

Alle tilbud fra INOX, herunder men ikke begrænset til tilbud, der fremgår af INOX' hjemmeside www.inox.dk er alene en opfordring til køber til at afgive en købsordre, og er ikke bindende for INOX før INOX skriftligt har accepteret købers ordre gennem en ordrebekræftelse. Købers ordre og levering af de deri omfattede produkter kan være omfattet af betaling af tillæg, herunder men ikke begrænset til fragt, emballage m.v. Sådanne tillæg faktureres sammen med faktureringen af købsordren.

Køber skal gennemgå ordrebekræftelsen ved modtagelsen og straks reklamere, hvis Køber mener, at der er fejl i denne. Hvis der ikke er reklameret straks - og senest ét døgn efter modtagelse af ordrebekræftelsen, er købsaftalen endelig, og kan ikke efterfølgende ændres uden skriftligt aftale med INOX.

3 Produktinformation

Alle oplysninger om vægt, dimensioner og kvalitet samt tekniske og andre data, der fremgår af kataloger, brochurer og website er vejledende - og kun bindende i det omfang, sådanne oplysninger indgår som en del af en aftale bekræftet af INOX.

4 Kvalitet/udførelse

Køber bærer selv ansvaret for, om tekniske data og materialet i sin helhed egner sig til hans behov. Er materialet ikke bestilt efter en standard eller med angiven kvalitetsbetegnelse, vil dette blive leveret i almindelig handelskvalitet og udførelse, uden ansvar for specielle kvalitetskrav.

5 Priser

INOX' priser er eksklusiv den til enhver tid gældende moms, andre afgifter, told, gebyrer, fragt o.lign. INOX forbeholder sig retten til at regulere prisen som følge af forhøjelser i terminal- og transportomkostninger, assurance, told, afgifter, gebyrer m.v., som måtte indtræde efter INOX accept af købers ordre. Det samme gælder i tilfælde af udenlandske, danske eller EU- myndigheders indgreb i prisdannelsen, herunder fastsættelse af bindende mindstepriser, samt indførelse af antidumpingtold, uldigningstold eller anden form for særtold og afgift. Såfremt der opstår ekstraordinære omkostninger som følge af forstyrrelse eller afspærring af sædvanlige transportveje, er INOX berettiget til at forhøje prisen tilsvarende.

6 Betaling

Medmindre andet er aftalt, er købesummen for alle leverancer forfaldne til betaling netto kontant ved købers modtagelse af faktura. Ved betaling senere end 14 dage efter fakturadatoen forrentes den til enhver tid værende saldo med 2 % pr. påbegyndt måned. Såfremt køber ikke overholder betalingsfristen, forbeholder INOX sig ret til at tilbageholde yderligere leverancer, indtil betaling har fundet sted. Køber er uberettiget til at tilbageholde nogen del af købesummen som sikkerhed for opfyldelse af eventuelle modkrav vedrørende andre leverancer og sådan tilbageholdelse vil være at betragte som væsentlig misligholdelse af aftalen.

7 Levering og risikoens overgang

Levering sker ex works (Incoterms 2020) fra INOX eller fra anden lokation, såfremt dette er aftalt. Såfremt leveringen af produktet foretages af fragtfører udpeget af Inox, overgår risikoen for produktets hændelige undergang ved leveringen til den aftalte leveringsadresse. Medmindre andet er aftalt, afholder køber omkostningerne for leveringen af produktet, der faktureres til køber fra INOX. Der tillades afvigelser i den leverede mængde på +/- 10 % af den bestilte mængde. I forbindelse med leveringen skal køber straks foretage en grundig.

8 Undersøgelsespligt og reklamation

Det påhviler køber at fortage en grundig og passende undersøgelse af de leverede varen straks efter modtagelsen/leveringen. Såfremt køber vil påberåbe sig en synlig skade på det leverede, skal køber straks og senest på leveringsdagen give INOX meddelelse herom. Såfremt køber vil påberåbe sig, at leverancen er utilstrækkelig eller behæftet med fejl, skal han senest 7 dage efter leveringen reklamere skriftligt. Under forudsætning af godkendt reklamation ombyttes eller udbedes den leverede vare eller godtgøres ved kreditering til købsprisen efter INOX' valg.

Uanset KBL § 54 stk. 3, udvides den lovbestemte reklationsfrist kun, hvis Køber inden aftalens indgåelse har meddelt Inox, at de bestilte produkter skal anvendes til byggen i Danmark. I så fald ophører mangelsansvaret for eventuelle fabriktionsfejl, der trods omhyggelig undersøgelse ikke kunne konstateres ved leveringen (skulde mangler), senest 3 år efter afleveringen af det byggen, hvori de leverede produkter indgår, dog højst 5 år fra overgivelse af produkterne fra Inox til køber.

9 Ansvar

INOX' ansvar er begrænset til direkte tab. Inox påtager sig ikke erstatningsansvar for indirekte tab, herunder men ikke begrænset til driftstab, tabt arbejdsfortjeneste

eller andet indirekte tab. INOX' ansvar er desuden i alle tilfælde begrænset til fakturværdien af den pågældende leverance eller delleverance, hvori den mangelfulde eller forsinkede vare indgår.

10 Produktansvar

INOX fraskriver sig ethvert produktansvar, der ikke følger af præceptive regler i produktansvarsloven. INOX er ikke ansvarlig for skade forvoldt på: a) fast ejendom eller løsøre, som indtræder, mens materialerne er i købers besiddelse. b) produkter, der er fremstillet af køber. c) produkter, hvori der indgår produkter fremstillet af køber eller, d) løsøre eller fast ejendom forårsaget af de i punkt c nævnte produkter. Køber skal holde INOX skadesløs i den udstrækning, INOX pålægges ansvar over for tredjemand for forhold som INOX i henhold til disse handelbetingelser eller anden skriftligt aftale ikke er ansvarlig for overfor køber. Hvis tredjemand fremsætter erstatningskrav omfattet af denne bestemmelse mod en af parterne, skal denne part straks underrette den anden herom.

11 Ejendomsforbehold

INOX forbeholder sig ejendomsretten til det solgte produkt indtil den fulde købesum inklusive eventuelle påløbne omkostninger, rente m.v. er betalt til INOX.

12 Returnering

Ved afbestilling eller returnering af ordre er køber forpligtiget til at skadelesholde INOX for ethvert tab og enhver omkostning, som INOX måtte lide i den sammenhæng. Returnering af fejlagtigt bestilte varer kan kun ske efter forudgående aftale og senest 8 dage efter levering. Ved returnering skal oprindelig faktura- eller ordrenummer altid oplyses til INOX inden returnering og returforsendelsen skal mærkes med et returnerenummer oplyst af INOX.

Såfremt INOX accepterer at foretage kreditering, fradrages der minimum et gebyr på 20 % af købesummen til dækning af INOX omkostninger, dog minimum 1.500 kr. - Undtaget er dog fejlskadede samt reklationsberettigede varer (i henhold til ovennævnte reklationsbetingelser). Ved kreditering af skaffeverar opkræves endvidere eventuel betaling af leverandørbetinget returfradrag og fragt. Med mindre andet er skriftligt aftalt, er det en betingelse for kreditering af returnerede varer, at disse er ubeskadiget stand, samt at de emballeres forsvarligt, helst i originalemballage.

13 Værksleveringer

For alle ordre leveret direkte fra værk gælder leveringsværkets salgs- og leveringsbetingelser aftalt med Inox. Købers egne købsbetingelser har kun gyldighed, hvis skriftligt udsagn herom foreligger fra leveringsværket.

14 Leveringstid

Leveringstiden regnes fra det tidspunkt, hvor alle spørgsmål vedrørende leveringsudførelse er klaget, og ordren definitivt noteret af INOX, respektive af vor leverandør. Leveringstiden er ikke bindende for INOX medmindre dette er skriftligt aftalt. Såfremt INOX erfarer, at en væsentlig overskridelse af den opgivne leveringstid er sandsynlig, påhviler det INOX at underrette køber, om muligt med oplysning om, hvornår levering kan påregnes at finde sted. Annullering af værksordrer som følge af forsinket levering anerkendes kun i det omfang leveringsværket er indforstået hermed.

16 Rammeaftale

Ved rammeaftale forstås en aftale, der forpligter køber til at aftage en bestemt mængde til levering, fakturering og betaling successivt over en given periode. Aftalen er bindende for hele ordremængden og kan ikke opsiges af parterne. Den samlede ordremængde leveres og faktureres senest ved aftaleperiodens udløb. Medmindre andet er aftalt, skal den samlede mængde være leveret og faktureret senest 12 måneder efter ordrebekræftelsen. Medmindre andet er aftalt, skal Inox levere en forholdsvis del af den samlede ordremængde fordelt jævnt over aftaleperioden. Er aftaleperioden 12 måneder, skal der således leveres 1/12 af den samlede mængde hver måned, første gang en måned efter ordrebekræftelsen. Medmindre andet er aftalt, er Inox ikke forpligtet til at levere mere end en forholdsvis mæssig andel per leveringstermin. Hvis Inox bliver forhindret i at opfylde rammeaftalen helt eller delvis som følge af leveringsproblemer fra værket, i form af forsinkelser eller mangler, er Inox dog ikke forpligtet til at opfylde den eventuelt uopfyldte del af rammeaftalen. I øvrigt henvises til force majeure bestemmelserne nedenfor.

16 Force majeure

Skulle der opstå strejke, lockout, epidemier, krig, naturkatastrofer, driftsforstyrrelser eller forstyrrelser i leveringsværkets normale transportsystem, eller anden hindring, som INOX ikke er herre over, ("Force majeure"), berettiger det INOX til at annullere ordren helt eller delvist i samme omfang, som værket gør det over for INOX. INOX er i så fald ikke pligtig til at placere ordren andetsteds. INOX kan heller ikke holdes ansvarlige for tab som følge af mangler, forsinkelse eller anden skade/misligholdelse, der skyldes Force Majeure.

17 Tvistigheder

Uoverensstemmelser mellem køber og INOX, som ikke bilægges ad forhandlingsvej, afgøres ved de almindelige danske domstole og efter dansk ret.

Andre udførsler og diverse tilbehør kan leveres fra fjernlager på få dage:

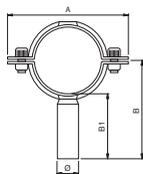

Butterflyventil

- med clamp ender
- med DIN union gevind ender
- med DIN union omløber ender
- kombineret: DIN union gevind / Svejseseende
- kombineret: DIN union gevind / DIN union omløber ender

Tilbehør

- Håndtag (standard, trinløs og m/ saksegreb)
- Ventilplader
- Pakninger i VMQ (Silikone), EPDM, FKM (Viton) og H-NBR

Guide til valg af pakninger

Valget af pakning afhænger af mediet, samt driftsbetingelserne. Nedenstående oversigt er en general guide til valg af pakninger.

EPDM

God bestandighed mod mange organiske væsker, herunder syrer og lud. Især velegnet til CIP. Ikke velegnet til mineralolier og fedt. Temperaturområde fra -40°C til 150°C.

FPM (Viton)

Overordentlig stor bestandighed mod mineralolier, syrer, alifatiske-, aromatiske og klorerede kulbrinter, samt de mest benyttede kemikalier indenfor fødevarerindustrien. Ikke egnet til damp og lud. Temperaturområde fra -30°C til 200°C.

NBR

God bestandighed mod mineralolier, fedt, vand og ætylenglycol. Ikke velegnet til CIP. Temperaturområde fra -40° til 100°C.

VMQ (Silikone)

God bestandighed mod de fleste medier, som benyttes i fødevarerindustrien. Ikke egnet til stærke syrer og baser. Temperaturområde fra -60° til 200°C.

PTFE (Teflon)

Overordentlig stor bestandighed mod de fleste kemikalier. Tager blivende form og må derfor ikke overspændes. Temperaturområde fra -100° til 250°C.

PTFE+ (Kuvert)

Overordentlig stor bestandighed mod de fleste kemikalier. Kuvertpakningen består af en PTFE kappe, som er i kontakt med mediet, samt en FPM (Viton) eller EPDM kerne som giver elasticitet. Temperaturområde med FPM fra -30°C til 200°C. Temperaturområde med EPDM fra -40°C til 140°C.

INOX Skærecentrer

Vi producerer også flanger efter tegning og med kort leveringstid.

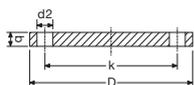

Vandstråleskæring

Tykkelse op til 150 mm
Diameter op til 2000 mm

Plasmaskæring

Tykkelse op til 150 mm
Diameter op til 2500 mm

Generelle Specifikationer

Hanehuse og endestykker	støbte (investment casting), kvalitet CF8M/ASTM A 351 svarende til AISI 316/ASTM A 479.
Sæder	PTFE+GF = glasfiberarmeret teflon (15% glasfiber), dog ikke 7017.
Spindler og kugler	af valset materiale, kvalitet AISI 316/ASTM A 479. Spindler har udblæsningssikker konstruktion, med justérbar pakning.
Spindelpakninger	PTFE = ren teflon.
Håndgreb	rustfrie, aflåselige, plastbelagte.
Endestykker med gevind	Whitworth rørgvind (BSPP) / ISO 228-1
Endestykker for svejsning	ISO 1127
Driftstemperatur	TC Model: - 40 til + 230° C Light Model: - 20 til + 190° C
Prøvetryk	API 598 / EN 12266-1
Certifikat	EN 10204 3.1 inkl. PED 97/23/EC

Plader i fixmål

INOX

**Vi har lagt coils på lager hos vores samarbejdspartner.
Det giver dig en række fordele:**

Du kan få plader i længder fra 150 - 8000 mm
Leveringstiden er kun 5-7 dage
Du får mindre spild og materialeudgifter
Dine lagerbindinger bliver mindre
Fixpladerne kan indgå direkte i din produktion

Ring til vores salgsafdeling for at høre nærmere
om minimumsmængde og priser

11 Sømløse rør

11 Sømløse rør

- 1 Sømløse, rustfrie og syrefaste stålrør

11 Sømløse rør

Sømløse, rustfrie og syrefaste stålrør

Lagerlængde 4-7 m, EN 10216-5 / ASTM A312

Tolerancer: EN ISO 1127

Standard: D3 = +/- 0,75%, min. +/- 0,30 mm. T3 = +/- 10%, min. +/- 0,20 mm

Hydrauliske: D4 = +/- 0,50%, min. +/- 0,10 mm. T3 = +/- 10%, min. +/- 0,20 mm

Udførelse: Standard sømløse rør er glødede og bejdsede

Hydrauliske sømløse rør er blankglødede

Driftstryk: Formlen til beregning af driftstryk ved 20°C: $\frac{200 \times 12 \times T}{D}$ T = godstykkelse

D = udvendig diameter

Materialcertifikater / Inspektionsdokumenter

Efter EN 10204

Standard	Dokument	Inspektions-type	Dokumentindhold	Leveringsbetingelser	Dokumentets gyldighed bekræftet af
"2.1"	Værkerklæring	Ikke-specifik	Uden angivelse af prøvningsresultater	I overensstemmelse med købsaftalens specifikationer og, hvis det kræves, også med myndighedsregler og tilsvarende tekniske regler	Producenten
"2.2"	Værksattest	Ikke-specifik	Med angivelse af prøvningsresultater opnået ved ikke-specifik inspektion og prøvning	I overensstemmelse med købsaftalens specifikationer og, hvis det kræves, også med myndighedsregler og tilsvarende tekniske regler	Producenten
"3.1"	Inspektions-certifikat 3.1	Specifik	Med angivelse af prøvningsresultater opnået ved specifik inspektion og prøvning	I overensstemmelse med købsaftalens specifikationer og, hvis det kræves, også med myndighedsregler og tilsvarende tekniske regler	Producentens autoriserede repræsentant, som er uafhængig af produktionsafdelingen
"3.2"	Inspektions-certifikat / rapport 3.2	Specifik	Med angivelse af prøvningsresultater opnået ved specifik inspektion og prøvning	I overensstemmelse med købsaftalens specifikationer	Producentens autoriserede repræsentant, som er uafhængig af produktionsafdelingen og købers autoriserede repræsentant

For 3.2 certifikater skal det ved ordreafgivelse entydigt specificeres, hvad købers autoriserede repræsentant skal bekræfte. For disse certifikater betales et honorar.

Certifikater på lagerleverancer

3.1-certifikat er altid til disposition. Omkostninger for levering heraf debiteres separat, eller kan hentes gratis på www.inox.dk

PED findes på visse materialer, hvor materialeproducentens kvalitetsstyringssystem er certificeret i overensstemmelse med PED 2014/68/EU

Omstemping

Arbejdstilsynets tilladelse af 09.04.2004, på basis af vores interne kvalitetsmanual.

Ikke-destruktiv prøvning

Penetrantprøvning (DPI, Dye-pen Inspection)

Overfladesprækker, porer i overfladen

Ultralydsprøvning (UT, Ultrasonic Testing)

Indvendige sprækker / hulrum, indeslutninger, svejsefejl.

Metoden bruges også for at måle godstykkelser på f.eks. rør og rørdele.

Røntgenprøvning (RT, Radiographic Testing, X-ray)

Indvendige sprækker / hulrum, indeslutninger, svejsefejl.

Metoden bruges også for at måle godstykkelser på f.eks. rør og rørdele.

Påviser f.eks. korrosionsangreb

Magnetpulverprøvning (MPI, Magnetic Powder Inspection)

Tester overfladefejl som sprækker, bindingsfejl i svejsning og laminering i overfladen.

Hvirvelstrømsprøvning (EC, Eddy Current Testing)

Måler sprækker ned til 1 mm i materialets overflade, tykkelsesmåling incl. korrosion og coating, måling af elektrisk ledningsevne, påvisning af varmepåvirkede zoner.

Materialeidentificering (PMI, Positive Material Inspection)

Er kontrol af legerings-/materialetype

Mekaniske egenskaber på 3.1 certifikat

		Engelsk	Dansk
Rp 0,2%	MPa = N/mm ²	Yield strength	Spænding (Flydespænding)
Rp 1%	MPa = N/mm ²	Yield strength	Spænding
Rm	MPa = N/mm ²	Tensile strength	Brudstyrke eller Trækstyrke
A%		Elongation	Brudforlængelse
KV (J)	ISO-V	Impact value	Slagsejhed
HB	HV	Hardness	Hårdhed HB = Brinell / HV = Vickers
Z%		Reduction of area	(Indsnøring)

Blindflanger	DIN 2527	EN 1092-1 Type 05
Gevindflanger	DIN 2566	EN 1092-1 Type 13
Påsvajningsflanger	DIN 2576	EN 1092-1 Type 01
Flanger m/krave	DIN 2631 - 2637	EN 1092-1 Type 11
Løslflanger	DIN 2642	EN 1092-1 Type 02

PED 2014/68/EU Tidligere PED 97/23/EC

PED står for "Pressure Equipment Directive" og er den fælles EU-norm for materialer og udstyr til trykbærende anlæg. For at et materiale kan være PED-godkendt, skal 2 ting være opfyldt:

1. Værket skal have en PED-godkendelse.
2. Materialet skal være produceret efter en harmoniseret EN-standard.

Følgende EN-standarder er godkendt til trykbærende formål i PED 2014/68/EU

- | | |
|--------------|----------------|
| ▪ EN 10028-7 | Plader |
| ▪ EN 10272 | Stang |
| ▪ EN 10216-5 | Sømløse Rør |
| ▪ EN 10217-7 | Svejste Rør |
| ▪ EN 10213-4 | Støbegods |
| ▪ EN 10222-5 | Smedegods |
| ▪ EN 1092-1 | Flanger |
| ▪ EN 10253-4 | Svejsefittings |
| ▪ EN 12516-3 | Kuglehænder |
| ▪ EN 10204 | Certifikater |

Hvis materialet ikke er produceret efter én af ovenstående EN-normer, er PED-godkendelsen for værket ikke gyldig på det pågældende materiale.

Værket skal ikke foretage ekstra tests af materialet på 3.1 certifikat i forhold til normalt, det er nok at værket er PED-godkendt og at materialet produceres efter en harmoniseret standard.

Service Center

- 1** Skæring
- 2** Savning

Skæring

I Skærecenteret kan du selv levere tegninger eller vi kan tegne emnerne for dig.

Produkter

Plade	Plasmaskæring	Vandstråleskæring
Tykkelse mm	8 - 150	8 - 150
Format mm	7000 x 2500	4000 x 3000

Vandstråleskæring

Teknologien bag vandstråleskæring tager udgangspunkt i en højtrykspumpe - Intensifieren.

I denne Intensifier påføres skærevandet et tryk på op til ca. 4000 bar. Det høje vandtryk accelererer vandet op til hastigheder på 750 - 1000 m/sek. når strålen forlader selve skæredysen. Dermed er det muligt at skære i stort set alle former for materiale. Blødt såvel som hårdt.

Ved hårde materialer som glas, kobber, aluminium, rustfri stål, beton osv. tilsættes vandet fint sand, abrasiv middel, typisk garnet sand. Derved skærer/sliber vandet sig gennem materialer.

- Vandstråleskæring giver kun lidt eller ingen efterbearbejdning
- Vi kan lave markeringer i emnerne
- Vi skærer også i andet end rustfrit
- Vi kan skære emner i op til 150 mm tykkelse

Plasmaskæring

Plasmaskæring er en elektrisk lysbueproces.

Snitfugen dannes ved smeltning og delvis fordampning.

Der benyttes en plasmastråle, der består af en strøm af luftarter med stor hastighed, høj elektrisk spænding og en temperatur på ca. 20.000°C.

Vi skærer under vand op til 60 mm, hvilket betyder, at emnet

- bliver mindre ophærdet i skærekanten
- er nemmere at efterbearbejde

Savning

I Savecenteret saver vi skiver af alle vores standardkvaliteter, dog ikke materialer med slebet overflade.

Produkt	Dimension mm
Skaldrejet rundstål	65 - 500
Emnerør	Min. 63

Vores hårdmetalklinger giver en pæn overflade

Vi kan stemple chargenr. i skiverne

Vi saver skiver ned til 10 mm tykkelse.
